Press Release

Neukirchen-Vluyn, October 1st, 2025

SCHWING Technologies – Innovations Driving the Plastics Industry Forward SCHWING at K 2025

The countdown is on: From **October 8 to 15, 2025**, the **K trade fair** in Düsseldorf will once again open its doors. Recognized worldwide as the leading trade fair for the plastics and rubber industries, it has been the most important industry gathering since its premiere in 1952.

For the **18th** time, **SCHWING Technologies** is proud to be part of this premier platform — a clear statement of our long-standing expertise and deep commitment to the industry.

As a pioneer in innovations for tool cleaning, **SCHWING Technologies** will showcase a groundbreaking solution at **K 2025**: the world's first cleaning systems with scalable thermal afterburners that can be operated entirely with electricity — **without any gas**.

This innovation opens up new opportunities for our customers: implementing thermal cleaning **flexibly** in locations without gas supply, operating sustainably with renewable energy, reducing dependency on fossil fuels, lowering CO₂ emissions, and ensuring long-term planning security for operating costs.

We warmly invite all interested parties to visit us in **Hall 9, Booth A51**. Discover the latest innovations from SCHWING Technologies and join us for a coffee and conversation.
